Income Declaration	Accrued Daily, Paid Monthly

### Who Should Invest?

The Pointbreak Money Market Fund is suitable for investors seeking a low risk investment that maximises income. It offers a high income yield, capital stability and good liquidity.

### Investment Objective

The fund's objective is to achieve an investment return in excess of general money market instruments and funds, while ensuring a high degree of liquidity, capital preservation and below average risk. The fund invests with the four major banking groups in Namibia, the five major banking groups in South Africa, Nampost Namibia and the Namibian, - and South African Reserve Bank. Securities to be included in the portfolio consist of money market instruments, participatory interests in unit trust schemes, bank call and fixed deposits, fixed income securities, government bills and bonds, quality commercial paper and repurchase agreements.

Cents per Unit (2024)	0.6670	0.6273	0.6693	0.6472								

Collective Investment Schemes in Securities (Unit Trusts) are generally medium to long term investments. The value of participatory interests (units) may go down as well as up and past performance is not necessarily a guide to the future. Unit Trust prices are calculated on a net asset value basis, which is the total capital value invested including any income accrual and less any permissible deductions from the portfolio divided by the number of units in issue. Income accruals are made daily and paid out monthly. Purchase and repurchase requests may be received by the manager by 10h00 each business day. Permissible deductions may include management fees, brokerage, NAMFISA levies, auditor's fees, bank charges, trustee fees and RSC levies. A schedule of fees and charges is available on request from Ashburton Unit Trust Management Company. Commission and incentives may be paid and if so, would be included in the overall costs.

### Fund Commentary

Stubborn US inflation again surprised the market on the upside and potential rate cuts by the Federal Reserve are being pushed out further, as the market acquaints itself with a "higher-for-longer" interest rate environment. Locally we have seen March headline inflation slowing with Namibia's print at 4.50% (February: 5.00%) and South Africa's print at 5.30% (February: 5.60%).

Long rates have strengthened throughout April. South African benchmark bond rates declining towards month-end with pre-election political risk fading on poll results, whilst Namibian spreads have contracted further, trading well below their South African counterparts, bolstered by the divergence of long-term economic sentiment between the two countries.

The fund continues to take advantage of attractive rates being offered in the South African sovereign and commercial banking sector.
