Gross of fees, income reinvested. Longer than 1 year figures are annualized. Returns earlier than 31 Jan 2023 are derived from the actual performance of a fund with a similar mandate.

NCPI - Namibia Inflation

Fund Comment

South African capital markets surged following the 2024 National and Provincial Election results, marking a new political era with unprecedented alliances. The potential coalition between the African National Congress and the Democratic Alliance has bolstered market sentiment, with the rand appreciating by 3.3% against the US dollar for the month. South Africa's headline inflation for May 2024 remained steady at 5.2% year-on-year, unchanged from April. Projections indicate a cooling trend, with inflation expected to dip below 5% towards the end of 2024. However, economic growth remains a concern, as the nation's GDP contracted by 0.1% quarter-on-quarter in Q1 2024. Namibia reported a slight uptick in headline inflation, rising to 4.9% in May from 4.8% in April 2024. In South Africa, Treasury Bill rates on the short-end of the curve increased in June, while local bank paper declined. Money Market rates in South Africa still yield above 9%, positioning the Fund advantageously.

Who Should Invest

The Fund is ideal for corporate entities seeking returns above traditional money market funds after management fees. The fund assumes higher credit risk than typical money market funds.

Risk Profile

Conservative Cautious Moderate Assertive Aggressive
